

Plotting continents and countries

You have got:

- A blank world map
- A map with continents
- A map with countries

What you need to do:

1. Label the 7 continents on your map, see if you can add any by yourself, and then use the map to add the remaining ones.
2. Add the following countries to your map, again, see if you know where they are and then check using the map.

Russian	Brazil	Greenland	Canada
China	Mexico	Sweden	
Chile	Spain	Japan	New Zealand

Challenge: label the oceans

Super challenge: draw on the equator
