

Home learning Activity 1: Creating collage

Your challenge is to make a collage using materials that you can find at home. It is entirely up to you what you wish to use depending on the resources you have at home. Artists such as Anthony Goldsworthy and Matisse made collages out of many different materials including paper, newspaper, computer generated images, fabrics and even the outdoors such as leaves, sticks and flowers. Your collage needs to include pattern for example stripes, spots, zigzags, waves, curves or even different shapes such as triangles, squares or semi-circles. Be as creative as you can and challenge yourself to make something eye catching! Remember: Collage doesn't need to be permanent so don't worry if you don't have resources such as glue or scissors at home, collage doesn't have to be cut perfectly or stuck down permanently. I can't wait to see what you create! (You could even take a photograph of what you create so you can share with your teacher).
